women s gun training near me: *Girls with Guns* France Winddance Twine, 2013-02-11 A nuanced understanding of state violence and gender (in)equalities must consider the varied and contradictory experiences of armed civilian women, female soldiers, and opponents of gun possession. How is 'feminism' and 'femininity' negotiated in the early 21st century by civilian and military women in a nation that fetishizes guns? This book addresses this social problem by offering a comparative analysis of the particular dilemmas that gender inequality, class inequality, race/racism and U.S. nationalism generate for women of diverse backgrounds who are struggling to balance conventional gender roles, femininity and gendered violence in the United States.

women s gun training near me: *Real Knockouts* Martha McCaughey, 1997-07-01 An examination of women's self-defense culture and its relationship to feminism. I was once a frightened feminist. So begins Martha McCaughey's odyssey into the dynamic world of women's self-defense, a culture which transforms women involved with it and which has equally profound implications for feminist theory and activism. Unprecedented numbers of American women are learning how to knock out, maim, even kill men who assault them. Sales of mace and pepper spray have skyrocketed. Some 14 million women own handguns. From behind the scenes at gun ranges, martial arts dojos, fitness centers offering Cardio Combat, and in padded attacker courses like Model Mugging, Real Knockouts demonstrates how self-defense trains women out of the femininity that makes them easy targets for men's abuse. And yet much feminist thought, like the broader American culture, seems deeply ambivalent about women's embrace of violence, even in self-defense. Investigating the connection between feminist theory and women physically fighting back, McCaughey found self-defense culture to embody, literally, a new brand of feminism.

women s gun training near me: *Colorado Women in World War II* Gail M. Beaton, 2020-08-24 Four months before the attack on Pearl Harbor on December 7, 1941, Mildred McClellan Melville, a member of the Denver Woman's Press Club, predicted that war would come for the United States and that its long arm would reach into the lives of all Americans. And reach it did. Colorado women from every corner of the state enlisted in the military, joined the workforce, and volunteered on the home front. As military women, they served as nurses and in hundreds of noncombat positions. In defense plants they riveted steel, made bullets, inspected bombs, operated cranes, and stored projectiles. They hosted USO canteens, nursed in civilian hospitals, donated blood, drove Red Cross vehicles, and led scrap drives; and they processed hundreds of thousands of forms and reports. Whether or not they worked outside the home, they wholeheartedly participated in a kaleidoscope of activities to support the war effort. In *Colorado Women in World War II* Gail M. Beaton interweaves nearly eighty oral histories—including interviews, historical studies, newspaper accounts, and organizational records—and historical photographs (many from the interviewees themselves) to shed light on women's participation in the war, exploring the dangers and triumphs they felt, the nature of their work, and the lasting ways in which the war influenced their lives. Beaton offers a new perspective on World War II—views from field hospitals, small steel companies, ammunition plants, college classrooms, and sugar beet fields—giving a rare look at how the war profoundly transformed the women of this state and will be a compelling new resource for readers, scholars, and students

interested in Colorado history and women's roles in World War II.

women s gun training near me: Gun Theology: Faith, Ethics, and the Controversies of Firearms Vincent Froom , 2024-11-22 Gun Theology: Faith, Ethics, and the Controversies of Firearms delves into one of the most polarizing issues facing American Christianity today—the complex relationship between faith and firearms. In this thought-provoking book, Vincent Froom explores the cultural, theological, and ethical dimensions of gun ownership, self-defense, and violence through a distinctly Christian lens. How does the gospel's call to be peacemakers align—or clash—with the right to protect oneself and one's family? With a balanced and compassionate approach, Gun Theology brings together scriptural insights, historical perspectives, and real-world case studies to examine both sides of the gun debate within Christianity. From the ethical tension between self-defense and nonviolence to the racial and gender dynamics of gun culture, this book challenges readers to rethink conventional stances and engage in meaningful dialogue. women s gun training near me: Women, Gender, and Terrorism Laura Sjoberg, Caron E. Gentry, 2011-12-01 In the last decade the world has witnessed a rise in women's participation in terrorism. Women, Gender, and Terrorism explores women's relationship with terrorism, with a keen eye on the political, gender, racial, and cultural dynamics of the contemporary world. Throughout most of the twentieth century, it was rare to hear about women terrorists. In the new millennium, however, women have increasingly taken active roles in carrying out suicide bombings, hijacking airplanes, and taking hostages in such places as Palestine, Iraq, Afghanistan, Sri Lanka, Lebanon, and Chechnya. These women terrorists have been the subject of a substantial amount of media and

scholarly attention, but the analysis of women, gender, and terrorism has been sparse and riddled with stereotypical thinking about women's capabilities and motivations. In the first section of this volume, contributors offer an overview of women's participation in and relationships with contemporary terrorism, and a historical chapter traces their involvement in the politics and conflicts of Islamic societies. The next section includes empirical and theoretical analysis of terrorist movements in Chechnya, Kashmir, Palestine, and Sri Lanka. The third section turns to women's involvement in al Qaeda and includes critical interrogations of the gendered media and the scholarly presentations of those women. The conclusion offers ways to further explore the subject of gender and terrorism based on the contributions made to the volume. Contributors to *Women, Gender, and Terrorism* expand our understanding of terrorism, one of the most troubling and complicated facets of the modern world.

women s gun training near me: Airplanes, Women, and Song Bois Sergievsky, 2017-01-30 Boris Sergievsky was one of the most colorful of the early aviators. He made his first flight less than ten years after the Wright brothers made theirs; he made his last only four years before the Concorde took off. Born in Russia, Sergievsky learned to fly in 1912. In World War I, he became a much-decorated infantry officer and then a fighter pilot, battling the Austro-Hungarians. During the Russian Civil War that followed, he fought on three fronts against the Bolsheviks. Coming to America in 1923, the first job he could find in New York was with a pick and shovel, digging the Holland Tunnel, but he soon joined Igor Sikorsky's airplane company. Over the next decade as chief test pilot for the company, he tested the Sikorsky flying boats that Pan American Airways used to establish its world-wide routes, setting seventeen world aviation records along the way. Sergievsky also flew pioneering flights across uncharted African and Latin American jungles in the 1930s, flew with Charles Lindbergh, tested early helicopters and jets, and flew his own Grumman Mallard on charter flights until 1965. Through it all, his sense of humor remained intact, as did his passion for beautiful women.

women s gun training near me: Gender and Firearms Peter Squires, 2024-04-01 Private gun ownership for self-defense remains a major personal and public issue in the United States, driven by concerns about crime, vulnerability and a range of 'ideological' factors, including race and gender. As media attention centres upon the extent to which women are taking up firearms, with the gun lobby and firearms manufacturers celebrating the 'new armed woman', and guns being promoted as 'Rape Prevention Kits', this book explores the changing gendered aspects of gun ownership. Can ownership of firearms by women be considered, as some have claimed, the embodiment of what might be termed 'pioneer feminism', as women resist male violence in a dangerous world, or are different stories told by the prominence of women in firearms control campaigns, or the fact that women remain frequent victims of male gun ownership? Analysing representations of the 'armed woman' in firearm and gun lobby marketing and advertising campaigns, together with television and popular music forms, *Gender and Firearms: My Body, My Choice, My Gun* examines the directions taken in the public debate on weaponisation in the United States, considering the role of women in the politics of gun safety and gun control. The book draws on statistical evidence in order to shed light on trends in gun ownership, whilst engaging with feminist scholarship on the relationship between gender, violence, risk and vulnerabilities, thus opening up critical new debates surrounding identity, performance, gender and risk in contemporary societies. As such the book will be of likely interest to sociologists and scholars of sociology, criminology, and cultural and media studies with interests in gender, embodiment, risk, crime and violence.

women s gun training near me: The Women Who Lived For Danger Marcus Binney, 2012-05-24 In World War II, 37 women were dropped in occupied France to work as Special Operations Executive agents and 'set Europe ablaze'. 13 never returned. They were executed in

Hitler's concentration camps. This is the fascinating story of eight of those female agents, all striking beauties (despite the need to be inconspicuous), all from civilian life, who were warned of the likelihood of arrest, torture and a brutal death before they volunteered. None demurred. These young women were given months of arduous fitness, gun, explosives, endurance and code training before parachuting into occupied territory. But *Women Who Lived for Danger* also contains eight very personal tales. Why did these women volunteer? Where did they come from? Marcus Binney tells of a life of Resistance work and uncover operations, clandestine activities and even armed combat, and a constant fear of discovery. But above this book tells of extreme bravery and devotion to duty.
