won hee physical 100: Therapy of Social Medicine Byong-Hyon Han, 2015-11-17 This book introduces novel and groundbreaking theories on social medicine, social medicine therapy and pharmacogelotology. Aimed at improving the global health care system in terms of cost-effectiveness and efficiency, the research included in this book represents a paradigm shift from traditional drugs to social medicine. Tracing the history of social medicine, from Natural Healing Power (NHP), Oriental Medicine's vitalism, to Homeostasis (Natural Healing Strength) and Reciprocity (Social Healing Strength), the book first focuses on laying the theoretical foundations. It then highlights how social medicine can be specialized into various social medicine therapies (i.e., aromatherapy, stone therapy, diet therapy, exercise therapy, light therapy, etc.), just like stem cells. This is followed by arguments that 21st century pharmacy should be a harmonious system where the replacement of traditional drug products (i.e., herbal, chemical, and biological products) with new social medicine takes precedence. To that end, the author focuses on the '4+2 system' with 4 representing diet, body, stress, and facial-image control, and 2 representing the complementary and alternative medical methods of evacuation(-) and filling(+). In the context of pharmacogelotology, the book then goes on to present findings on theories of laughter and laughter therapy practices, which are systematically examined and described in detail. Finally, it calls for the development of social-medicine structures by governments that aim to help local authorities use their resources effectively, and for local governments to establish the long-term planning on social-medicine therapy for healthy ageing.

won hee physical 100: Performing Korea Patrice Pavis, 2017-01-12 This book offers an exploration of the intersection of Korean theatre practice with Western literary theatre. Gangnam Style, K-Pop, the Korean Wave : who hasn't heard of these recent Korean phenomena? Having spent two years in Korea as a theatrical and cultural 'tourist', Patrice Pavis was granted an unparalleled look at contemporary Korean culture. As well as analyzing these pop culture mainstays, however, he also discovered many uniquely Korean jewels of contemporary art and performance. Examining topics including contemporary dance, puppets, installations, modernized pansori, 'Koreanized' productions of European Classics and K-pop and its parody, this book provides a framework for an intercultural and globalized approach to Korean theatre. With the first three chapters of the book outlining methodology, the remaining chapters test - often deconstructing and transforming in the process - this framework, using focused case studies to introduce the reader to the cultural and artistic world of a nation with an increasing international presence in theatre and the arts alike.

won hee physical 100: *Damned Women* Elizabeth Reis, 1999-01-18 In her analysis of the cultural construction of gender in early America, Elizabeth Reis explores the intersection of Puritan theology, Puritan evaluations of womanhood, and the Salem witchcraft episodes. She finds in those intersections the basis for understanding why women were accused of witchcraft more often than men, why they confessed more often, and why they frequently accused other women of being witches. In negotiating their beliefs about the devil's powers, both women and men embedded womanhood in the discourse of depravity. Puritan ministers insisted that women and men were equal in the sight of God, with both sexes equally capable of cleaving to Christ or to the devil. Nevertheless, Reis explains, womanhood and evil were inextricably linked in the minds and hearts of seventeenth-century New England Puritans. Women and men feared hell equally but Puritan culture encouraged women to believe it was their vile natures that would take them there rather than the particular sins they might have committed. Following the Salem witchcraft trials, Reis argues, Puritans' understanding of sin and the devil changed. Ministers and laity conceived of a Satan who tempted sinners and presided physically over hell, rather than one who possessed souls in the living world. Women and men became increasingly confident of their redemption, although women more than men continued to imagine themselves as essentially corrupt, even after the Great Awakening.
