women in leadership quote: *Women's Leadership Quotes* Kayla Stajkovic, Alex Stajkovic, 2022-03-08 Public leadership is about relationships between the science of leadership and society. Purveyors of change are needed to build bridges between the everyday duties of leadership scholars and consumers of leadership knowledge in the public. There is no an easy roadmap toward social transformation through public leadership. Solving social problems requires collaborative partnerships, participatory involvement, and public engagement. Counter to prevailing notions of think-manager, think-male in which a preferred leadership style is one more often associated with masculinity - autocratic, decisive, and controlling, recent research shows that in a social crisis, women seem to be more effective leaders. In our 2020 article in the Journal of Applied Psychology, we found that states with a woman governor were associated with fewer COVID-19 deaths during early stages of the global pandemic than states with a male governor. A text analysis of governors' briefings revealed that women governors displayed greater empathy and confidence. These strong women leaders spoke about issues relevant to their followers, and they embodied compassion for how their people might be feeling during the unprecedented times. Women governors also conveyed more confidence in a brighter future ahead. Studies continue to emerge supporting a female leadership advantage in a crisis. This book is dedicated to this emerging research stream, providing practical qualitative illustrations of effective women leaders throughout history. Public leadership is an urgent and unfinished project. By summarizing and presenting quotes in one place, this book represents a modest attempt to contribute meaningfully toward building an architecture of leadership through the lenses of women leaders.

women in leadership quote: *Women Leadership in Emerging Markets* Shireen Chengadu, Caren Scheepers, 2017-07-06 This book focuses on the increase in female leadership over the last fifty years, and the concrete benefits and challenges this leads to in organizations. It moves beyond the typical focus on developed, Western contexts and answers the call for research on how women in emerging markets rise above the proverbial “glass ceiling”. The authors integrate two underdeveloped topics that are highly relevant to modern business: women in leadership roles, and women in emerging markets. They examine how women leaders in a range of professional services—including accounting, consulting, law, engineering and medicine—have managed to navigate their careers while considering the role emerging markets play in their work. Based on cutting-edge research, the topics are brought to life through examples and profiles of leading women across Africa, the Middle East and the Far East. These narratives, told in the leaders’ own words, are key to understanding women’s achievements and the barriers they face. Students of leadership, diversity, gender studies, and human resource management will learn much from this insightful book.

women in leadership quote: *Young Women and Leadership* Katrina Lee-Koo, Lesley Pruitt, 2020-04-07 Through a range of case studies in Asia and the Pacific, this edited collection highlights the extent of the unique ways in which young women lead to create change in their own lives and their communities, as well as in the structures, cultures, and institutions in which they live and work. This volume challenges and reshapes the boundaries and relationships of power that animate traditional attitudes to leadership by exploring the often overlooked role of women as leaders and drivers of social change. The text draws on a number of complex case studies in Asia and the Pacific in order to demonstrate how young women around the world have developed organised approaches to leadership that are often collective, collaborative, and transformative. However, as the authors

reveal, they also deviate from traditional forms of leadership that have dominated the literature and public understanding. This book will be of interest to students and scholars of the theory and/or practice of leadership. More broadly, it will also be useful for students and scholars of political science, international studies, peace and conflict studies, international and community development, leadership studies, cultural studies, youth studies, and gender studies.
