women s confidence quotes: *Confidence Culture* Shani Orgad, Rosalind Gill, 2021-12-06 In *Confidence Culture*, Shani Orgad and Rosalind Gill argue that imperatives directed at women to “love your body” and “believe in yourself” imply that psychological blocks rather than entrenched social injustices hold women back. Interrogating the prominence of confidence in contemporary discourse about body image, workplace, relationships, motherhood, and international development, Orgad and Gill draw on Foucault’s notion of technologies of self to demonstrate how “confidence culture” demands of women near-constant introspection and vigilance in the service of self-improvement. They argue that while confidence messaging may feel good, it does not address structural and systemic oppression. Rather, confidence culture suggests that women—along with people of color, the disabled, and other marginalized groups—are responsible for their own conditions. Rejecting confidence culture’s remaking of feminism along individualistic and neoliberal lines, Orgad and Gill explore alternative articulations of feminism that go beyond the confidence imperative.

Alison Kosik, 2025-03-04 Former CNN/CNN International Anchor and Business Correspondent Alison Kosik —recognized around the globe as the face of Wall Street for the network — found herself trapped in a failing marriage. The savvy mother of two, was terrified to leave her husband. Why? She didn't have the confidence to take on big financial decisions on her own. Despite spending her working hours explaining financial and business concepts, she had allowed her husband to take charge of all their big money decisions — from buying a house and how to finance it to their investments and retirement savings — and had no clue how to do any of it on her own. It sounds crazy, doesn't it? But Alison is far from atypical. It turns out plenty of educated and high-achieving women — married or single — avoid getting involved with managing their financial lives. In *What's Up With Women*

This book investigates, and reveals that the voices of survivors of domestic violence are often simply not heard; silenced, the women themselves become invisible. *Is Anyone Listening?* draws on the experiences of other service user movements to provide a strong conceptual framework for thinking about abused women's participation in policy and service development. It discusses empowerment issues and the women's movement against gender violence, exploring how far refuge organisations and other women's movement services have influenced statutory services and vice versa. It includes many practical ideas for involving women in the improvement of both policy and practice and gives examples of inspiring and innovative projects. Based on a study carried out as part of the Economic and Social Research Council's Violence Research Programme, *Is Anyone Listening?* offers a unique analysis of the sensitive and complex issues involved in developing service user participation within the domestic violence field. The insights it provides will enable policy-makers, activists, students, practitioners and women who have experienced domestic violence to move forward together.
